IS101 Word Project 6

Campus Life Newsletter: Editorial Review

14 Tasks · 100 Points

Scenario

You are a work-study student in the CSN Office of Student Engagement. A staff writer's draft article for the fall issue of the *Campus Life Newsletter* has already been through two rounds of peer review — a copyeditor and a second reviewer both left comments and tracked changes directly in the file. Your job is to finish resolving their feedback, clean up leftover formatting problems, finish the photo and pull-quote treatments, and lock the file down before it goes to the print shop.

Before you start: open the starter file **Word_Project6_Starter.docx** and save a copy with your own name in the filename (e.g., *LastName_FirstName_Project6.docx*). Complete all 14 tasks below in that copy, then submit it through the grading site.

Tasks

1. Remove hidden personal information (6 pts)

The previous student worker's name is still saved in this file's document properties. Before it goes to an external print shop, remove it.

> **How:** File → Info → Check for Issues → Inspect Document → Remove Document Properties and Personal Information.

2. Fix the "Staff Spotlight" heading with Format Painter (6 pts)

The "Staff Spotlight" heading doesn't match the formatting of "Upcoming Events" above it — someone typed it manually instead of using the heading style. Fix it using Format Painter.

> **How:** Click inside "Upcoming Events" → Home → Format Painter → click/drag over "Staff Spotlight."

3. Clear the formatting on the editor's note (6 pts)

The paragraph starting "Editor's note:" was pasted in from an email and still has the wrong font, size, and color. Clean it up.

> **How:** Select the paragraph → Home → Clear All Formatting (the eraser icon).

4. Change the footnote numbering format (7 pts)

The newsletter's style guide calls for lowercase roman numeral footnotes (i, ii, iii), not the default numbering currently in the file.

> **How:** References tab → click the small Footnote dialog-launcher arrow → Number format → choose i, ii, iii → Apply.

5. Apply an artistic effect to the fall festival photo (8 pts)

> **How:** Select the fall festival photo → Picture Format → Artistic Effects → choose any effect.

6. Apply a picture style to the staff spotlight photo (7 pts)

> **How:** Select the staff spotlight photo → Picture Format → Picture Styles → choose any style (a border and/or shadow style both work).

7. Remove the background from the club logo (8 pts)

How: Select the club logo image → Picture Format → Remove Background → adjust the marked area if needed → Keep Changes.

8. Format the pull-quote callout shape (7 pts)

The pull-quote box near the end of the article has no fill or outline color yet.

How: Click the edge of the callout shape → Shape Format → Shape Fill (choose a color) and Shape Outline (choose a color).

9. Add the pull-quote text (7 pts)

The same callout shape is still empty.

How: Click inside the callout shape and type a short quote from a student about getting involved on campus.

10. Delete the outdated comment (7 pts)

The copyeditor left a comment that says it's already been addressed — it should have been deleted, not left in the file.

How: Right-click that comment → Delete Comment.

11. Resolve the headline comment (7 pts)

The second reviewer left an open comment asking you to double-check the headline. Once you're satisfied it's correct, mark it resolved (don't delete it — resolving keeps a record that it was reviewed).

How: Click the comment → Resolve.

12. Accept the correction to the opening sentence (8 pts)

The copyeditor tracked a correction to the festival attendance number in the opening paragraph. It's correct — accept it.

How: Review tab → click directly on the tracked change → Accept (or Accept → Accept and Move to Next).

13. Reject the incorrect edit to the event date (8 pts)

The second reviewer tracked a change to the festival date that is actually wrong — the original date was correct. Reject their edit.

How: Review tab → click directly on the tracked change → Reject (or Reject → Reject and Move to Next).

14. Lock Track Changes before sending to print (8 pts)

Once you've resolved everything above, turn on and lock Track Changes so no further edits can slip through untracked.

How: Review tab → Restrict Editing → check "Allow only this type of editing" → select "Tracked changes" → Yes, Start Enforcing Protection (a password is optional).

TOTAL **100 points · 14 tasks**

Submission

Save your completed file and upload it to the Project 6 grading page. Your score and task-by-task feedback will appear immediately.
