Employee Training Manual

Nevada Valley Healthcare

100 pts

Unit 2 — Word Processing · Core Project Option B

/ 100 points

How to use this instruction sheet: Download the starter file from the Project Grader, open it in Microsoft Word 365, and keep this sheet open beside it. Work through each task in order. Each task tells you what to do, why it matters, and where to find the tool — but you must figure out the exact steps yourself. That's the learning.

Screen Recording Requirement

To verify your own work, record yourself completing 3 tasks while working on this project.

- Use Xbox Game Bar (press Win+G) or Loom (loom.com — free account) to record your screen
- Show yourself completing any 3 tasks from the list below
- Submit the recording to Canvas along with your completed file

D1 — Manage Documents

22 points (10 tasks)

2

Task 1 — Set 1-inch top/bottom margins and 1.25-inch left/right margins

WHY THIS MATTERS

Training manuals use wider side margins to leave room for reader notes and to prevent text from running too close to the binding edge.

WHERE TO FIND IT

Layout tab → Page Setup group → Margins → Custom Margins. Set Top and Bottom to 1" and Left and Right to 1.25".

HOW YOU'LL KNOW IT WORKED

The left and right margins are slightly wider than the top and bottom. The ruler shows the text area starting at 1.25" from the left.

2

Task 2 — Set the paper size to Letter (8.5" × 11")

WHY THIS MATTERS

Letter size is the standard for US business documents. Confirming the paper size prevents printing issues when the file is shared.

WHERE TO FIND IT

Layout tab → Page Setup group → Size → Letter.

HOW YOU'LL KNOW IT WORKED

Layout tab → Page Setup dialog shows Width: 8.5" and Height: 11".

2

Task 3 — Apply the "Shaded" style set to the document

WHY THIS MATTERS

The Shaded style set uses a distinctive heading design with colored backgrounds, which works well for training manuals that need clear section separation.

WHERE TO FIND IT

Design tab → Document Formatting group → Style Sets gallery → hover to find "Shaded" → click it.

HOW YOU'LL KNOW IT WORKED

Heading styles now have a colored background shading applied. The document's overall look changes.

3

Task 4 — Insert a header with the full manual title on every page

WHY THIS MATTERS

The header reinforces the document title on every page, which is important for training materials that may be printed and distributed.

WHERE TO FIND IT

Insert tab → Header & Footer group → Header → Edit Header. Type "Nevada Valley Healthcare — Employee Training Manual".

HOW YOU'LL KNOW IT WORKED

Every page displays the manual title in the header area at the top.

2

Task 5 — Insert a footer with the department name and current page number

WHY THIS MATTERS

Footers with page numbers help employees navigate a printed training manual and identify which department the section belongs to.

WHERE TO FIND IT

Insert tab → Footer → Edit Footer. Type the department name, then use Header & Footer tab → Insert → Page Number to add the number.

HOW YOU'LL KNOW IT WORKED

Every page shows the department name and its page number in the footer.

2

Task 6 — Insert page numbers starting at 1 after the cover page

WHY THIS MATTERS

Training manuals typically don't number the cover page. Starting numbering at page 2 with number "1" is the professional standard.

WHERE TO FIND IT

Insert a section break after the cover page. In the second section, go to Header & Footer tab → Page Number → Format Page Numbers → Start at: 1.

HOW YOU'LL KNOW IT WORKED

The cover page has no page number. The first content page shows "1".

2

Task 7 — Add a "CONFIDENTIAL" watermark to all pages

WHY THIS MATTERS

Employee training manuals contain sensitive HR and policy information that should not be shared outside the organization.

WHERE TO FIND IT

Design tab → Page Background group → Watermark → choose CONFIDENTIAL 1 from the gallery.

HOW YOU'LL KNOW IT WORKED

The word "CONFIDENTIAL" appears diagonally in light gray on every page.

2

Task 8 — Set document properties: Title, Author, Subject, and Keywords

WHY THIS MATTERS

Complete document properties make files searchable and identifiable in HR document management systems.

WHERE TO FIND IT

File tab → Info → Properties panel (right side). Fill in Title, Author, Subject, and Keywords fields.

HOW YOU'LL KNOW IT WORKED

File → Info shows all four property fields filled in.

2

Task 9 — Remove hidden properties and personal information from the document

WHY THIS MATTERS

Word embeds author names, revision history, and computer information in documents. Removing this protects privacy before external distribution.

WHERE TO FIND IT

File tab → Info → Check for Issues → Inspect Document → Run Inspection → Remove All next to Document Properties and Personal Information.

HOW YOU'LL KNOW IT WORKED

The Document Inspector shows those items have been removed.

3

Task 10 — Save the document as a PDF for printing and distribution

WHY THIS MATTERS

PDF preserves formatting exactly across all devices and prevents employees from accidentally editing the official manual.

WHERE TO FIND IT

File tab → Save As → change file type to PDF (*.pdf) → Save.

HOW YOU'LL KNOW IT WORKED

A PDF file appears in your folder. Opening it shows the document looks identical to the Word version.

D2 — Format Text & Paragraphs

20 points (8 tasks)

2

Task 11 — Use Find & Replace to change every "NVH" to "Nevada Valley Healthcare"

WHY THIS MATTERS

The starter file uses the abbreviation NVH throughout. The printed manual should always use the full organization name for clarity.

WHERE TO FIND IT

Ctrl+H → Find What: NVH → Replace With: Nevada Valley Healthcare → Replace All.

HOW YOU'LL KNOW IT WORKED

No instances of "NVH" remain in the document (search for NVH and it returns 0 results).

2

Task 12 — Apply the Title style to the manual title on the cover page

WHY THIS MATTERS

The Title style creates a visually distinct main heading that sets the document's tone and can be used by the TOC.

WHERE TO FIND IT

Click on the manual title text → Home tab → Styles group → Title.

HOW YOU'LL KNOW IT WORKED

The cover page title appears in a large, prominent font distinctly different from body text.

3

Task 13 — Apply Heading 1 style to every chapter title in the document

WHY THIS MATTERS

Chapter titles using Heading 1 appear as top-level entries in the Table of Contents and create the document's main navigation structure.

WHERE TO FIND IT

Click each chapter title → Home tab → Styles → Heading 1. Repeat for every chapter.

HOW YOU'LL KNOW IT WORKED

All chapter titles display in a consistent large format. They appear as top-level items in the Navigation Pane.

3

Task 14 — Apply Heading 2 style to every section title within chapters

WHY THIS MATTERS

Section titles using Heading 2 appear indented under their chapter in the TOC, showing the document hierarchy.

WHERE TO FIND IT

Click each section title → Home tab → Styles → Heading 2. Repeat for all section titles.

HOW YOU'LL KNOW IT WORKED

Section titles appear in a slightly smaller format than chapter titles and are indented below them in the Navigation Pane.

2

Task 15 — Set body text line spacing to double (2.0) throughout the document

WHY THIS MATTERS

Double spacing makes training materials easier to read and leaves room for employees to write notes directly on printed pages.

WHERE TO FIND IT

Select all (Ctrl+A) → Home tab → Line and Paragraph Spacing → 2.0.

HOW YOU'LL KNOW IT WORKED

There is a full line of blank space between every line of text.

2

Task 16 — Set 12pt spacing before each Heading 1

WHY THIS MATTERS

Space before headings creates visual breathing room that helps readers recognize the start of a new chapter at a glance.

WHERE TO FIND IT

Click any Heading 1 → Layout tab → Paragraph group → change "Before" to 12 pt. Right-click → Modify the Heading 1 style to apply to all.

HOW YOU'LL KNOW IT WORKED

There is extra space above every chapter title, visually separating it from the previous section.

3

Task 17 — Insert a page break before each new chapter

WHY THIS MATTERS

Starting each chapter on a new page is standard for manuals and makes the document easier to navigate and print.

WHERE TO FIND IT

Place your cursor just before each chapter heading. Insert tab → Pages group → Page Break. Or press Ctrl+Enter.

HOW YOU'LL KNOW IT WORKED

Each chapter begins at the top of a new page with nothing from the previous chapter visible above it.

3

Task 18 — Format the "Quick Reference" section in two columns

WHY THIS MATTERS

Two-column layout fits more information on the page and is commonly used for reference sections, making information easier to scan.

WHERE TO FIND IT

Select the Quick Reference section content. Layout tab → Page Setup group → Columns → Two.

HOW YOU'LL KNOW IT WORKED

The Quick Reference section content flows in two side-by-side columns on the page.

D3 — Tables & Lists

14 points (6 tasks)

3

Task 19 — Create a 3-column table for the employee benefits summary

WHY THIS MATTERS

A table makes benefits information easy to compare across columns (Benefit, Coverage Level, Enrollment Period) far better than plain paragraphs.

WHERE TO FIND IT

Position cursor where the table goes. Insert tab → Tables → Table → select 3 columns and as many rows as you need benefits entries.

HOW YOU'LL KNOW IT WORKED

A 3-column table appears. You can type benefit information into each cell.

2

Task 20 — Merge the header row cells and apply shading to the header

WHY THIS MATTERS

A merged, shaded header row visually distinguishes the table title from the data and makes the table look professional.

WHERE TO FIND IT

Select all cells in row 1. Table Layout tab → Merge group → Merge Cells. Then Table Design tab → Table Styles group → Shading to choose a color.

HOW YOU'LL KNOW IT WORKED

Row 1 is one wide cell with a colored background. Data rows below remain as individual cells.

2

Task 21 — Enable "Repeat Header Row" so the header repeats on every page

WHY THIS MATTERS

When a table spans multiple pages, repeating the header row helps readers remember what each column means without scrolling back.

WHERE TO FIND IT

Click in the header row of the table. Table Layout tab → Data group → Repeat Header Rows button.

HOW YOU'LL KNOW IT WORKED

If you scroll to a second page of the table, the header row appears at the top of the table on that page too.

2

Task 22 — Create a numbered checklist of the Day 1 new hire tasks

WHY THIS MATTERS

A numbered list creates a step-by-step checklist new employees can follow and check off, which is more actionable than a paragraph.

WHERE TO FIND IT

Type each task on its own line. Select all tasks. Home tab → Paragraph group → Numbering button.

HOW YOU'LL KNOW IT WORKED

Each task is automatically numbered. The list looks like: 1. Complete HR paperwork, 2. Receive badge, etc.

2

Task 23 — Create a bulleted list of workplace conduct guidelines

WHY THIS MATTERS

Bulleted lists present policy items clearly without implying a specific order or ranking among the guidelines.

WHERE TO FIND IT

Type each guideline. Select all. Home tab → Paragraph group → Bullets button.

HOW YOU'LL KNOW IT WORKED

Each guideline has a bullet point (•) in front of it.

3

Task 24 — Add second-level bulleted sub-items under each conduct guideline

WHY THIS MATTERS

Sub-items explain or give examples for each guideline, creating a two-level hierarchy that provides detail without cluttering the main list.

WHERE TO FIND IT

Press Enter after a main bullet, then press Tab to indent to the second level. Type the sub-item. Or use Home tab → Paragraph → Increase Indent.

HOW YOU'LL KNOW IT WORKED

Sub-items appear indented further right than the main guidelines and may have a different bullet style (like ■ instead of •).

D4 — References

10 points (3 tasks)

3

Task 25 — Insert a Table of Contents showing all chapters and sections

WHY THIS MATTERS

A TOC is essential for any multi-chapter document. It lets employees jump directly to the section they need.

WHERE TO FIND IT

Position cursor on a blank page after the cover. References tab → Table of Contents group → Table of Contents → choose an Automatic style.

HOW YOU'LL KNOW IT WORKED

A TOC appears with clickable links to each chapter and section, along with page numbers.

3

Task 26 — Customize the TOC to use dotted leaders and show 3 heading levels

WHY THIS MATTERS

Dotted leaders (the .....) connect section names to page numbers, making the TOC easier to read. 3 levels ensures subsections appear.

WHERE TO FIND IT

References tab → Table of Contents → Custom Table of Contents → set Show levels to 3 → choose a Tab leader style with dots → OK.

HOW YOU'LL KNOW IT WORKED

The TOC shows 3 levels of headings with dotted lines connecting each entry to its page number.

4

Task 27 — Insert endnotes citing the regulatory sources for the compliance policies

WHY THIS MATTERS

Endnotes (at the end of the document) cite legal and regulatory sources, showing that policies are based on actual laws and regulations.

WHERE TO FIND IT

Place cursor after the compliance text that references the regulation. References tab → Footnotes group → Insert Endnote. Type the citation in the endnote area.

HOW YOU'LL KNOW IT WORKED

Superscript numbers appear in the compliance sections, and corresponding citations appear at the very end of the document.

D5 — Graphic Elements

20 points (7 tasks)

3

Task 28 — Insert the NVH logo image on the cover page

WHY THIS MATTERS

The organization logo establishes brand identity and makes the manual look official rather than generic.

WHERE TO FIND IT

Insert tab → Illustrations → Pictures → This Device. Browse to the logo file and click Insert.

HOW YOU'LL KNOW IT WORKED

The logo image appears on the cover page.

2

Task 29 — Apply the "Soft Edge" picture style to the logo

WHY THIS MATTERS

A soft edge effect gently fades the logo's border, creating a polished look that integrates well with the document background.

WHERE TO FIND IT

Click the logo. Picture Format tab → Picture Styles gallery → hover to find a Soft Edge style → click it.

HOW YOU'LL KNOW IT WORKED

The logo's edges appear softly faded rather than having a hard rectangular border.

2

Task 30 — Set text wrapping to "Square" for the logo

WHY THIS MATTERS

"Square" wrapping keeps the text in a neat rectangular area around the logo, which is cleaner than the default In Line with Text setting.

WHERE TO FIND IT

Click logo → Picture Format tab → Arrange group → Wrap Text → Square.

HOW YOU'LL KNOW IT WORKED

Text wraps in a clean rectangular shape around the logo.

3

Task 31 — Insert a SmartArt Process diagram showing the 5 onboarding stages

WHY THIS MATTERS

A visual process diagram shows new employees the onboarding journey at a glance, which is more engaging and memorable than a list.

WHERE TO FIND IT

Insert tab → Illustrations → SmartArt → Process category → choose a process layout → OK. Enter the 5 stages in the text pane.

HOW YOU'LL KNOW IT WORKED

A connected sequence of shapes appears, each representing one onboarding stage, with arrows between them.

3

Task 32 — Modify the SmartArt to show the actual 5 onboarding stage names

WHY THIS MATTERS

The SmartArt needs real content (Week 1: Orientation, Week 2: Training, etc.) rather than placeholder text to be useful for new employees.

WHERE TO FIND IT

Click the SmartArt. Open the text pane by clicking the arrow on the left edge. Click each shape's text area and type the stage name.

HOW YOU'LL KNOW IT WORKED

Each shape in the diagram shows a real NVH onboarding stage name.

3

Task 33 — Insert an icon representing each department in the organizational section

WHY THIS MATTERS

Icons provide quick visual identification for departments, making the org section easier to navigate for employees looking for their department.

WHERE TO FIND IT

Insert tab → Illustrations group → Icons. Search for relevant icons (stethoscope for Nursing, computer for IT, etc.). Insert and resize each one.

HOW YOU'LL KNOW IT WORKED

Each department in the org section has a relevant small icon beside its name.

4

Task 34 — Add descriptive alt text to every image and SmartArt in the document

WHY THIS MATTERS

Healthcare organizations are legally required to make documents accessible to employees with disabilities who use screen readers.

WHERE TO FIND IT

Right-click each image or SmartArt → Edit Alt Text → type a clear description of what each visual shows.

HOW YOU'LL KNOW IT WORKED

Right-clicking any image shows the Alt Text pane with your description filled in.

D6 — Collaboration

14 points (6 tasks)

2

Task 35 — Add a comment on the benefits table requesting HR review

WHY THIS MATTERS

Comments let you flag items for review without changing content. The benefits table needs HR verification before the manual is finalized.

WHERE TO FIND IT

Select a cell in the benefits table or the table title. Review tab → Comments group → New Comment. Type your review request.

HOW YOU'LL KNOW IT WORKED

A comment bubble appears connected to the benefits table.

2

Task 36 — Reply to the existing comment from the department manager

WHY THIS MATTERS

Replying creates a comment thread, showing the conversation history for document reviewers.

WHERE TO FIND IT

Find the existing manager comment in the sidebar. Click the Reply button that appears under the comment text.

HOW YOU'LL KNOW IT WORKED

Your reply is indented below the manager's comment in the same thread.

2

Task 37 — Delete the comment that has already been addressed

WHY THIS MATTERS

Deleting resolved comments keeps the review panel clean and signals that those items no longer need attention.

WHERE TO FIND IT

Right-click the comment in the sidebar → Delete Comment. Or click the comment and use Review tab → Comments → Delete.

HOW YOU'LL KNOW IT WORKED

The comment no longer appears in the document or sidebar.

3

Task 38 — Turn on Track Changes and revise the PTO policy section

WHY THIS MATTERS

Using Track Changes lets HR leadership review exactly what was changed in a policy section before approving the final version.

WHERE TO FIND IT

Review tab → Tracking group → Track Changes (toggle on). Then make changes to the PTO policy text.

HOW YOU'LL KNOW IT WORKED

Your edits appear in a different color. Insertions are underlined and deletions are shown with strikethrough.

2

Task 39 — Accept the tracked changes that correct policy language

WHY THIS MATTERS

Accepting changes finalizes the correct version and removes the markup, incorporating the approved edits permanently.

WHERE TO FIND IT

Navigate to each tracked change with Review tab → Changes → Next. Review it, then click Accept to incorporate it.

HOW YOU'LL KNOW IT WORKED

The accepted changes are incorporated into the text with no markup remaining.

3

Task 40 — Reject the tracked change that incorrectly modified the benefits structure

WHY THIS MATTERS

Rejecting a change restores the original text, undoing an edit that should not have been made.

WHERE TO FIND IT

Use Review tab → Changes → Next to find the incorrect change. Click Reject (not Reject All) to undo only that specific change.

HOW YOU'LL KNOW IT WORKED

The rejected change is undone — the original text is restored for that specific edit.
