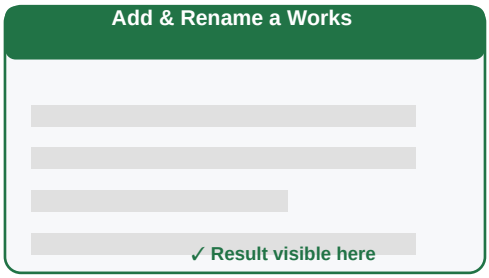
1 Add & Rename a Worksheet

Your Task: Add a new worksheet to the workbook and rename it "Q4 Data".

STEP-BY-STEP INSTRUCTIONS

1. Right-click any sheet tab at the bottom of the screen.
2. Choose Insert → Worksheet → OK.
3. Double-click the new sheet tab to rename it.
4. Type Q4 Data and press Enter.

WHAT THE RESULT LOOKS LIKE



A new tab labeled "Q4 Data" appears at the bottom of the workbook. Click it to switch to that sheet.

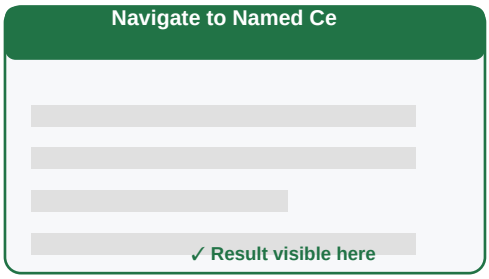
2 Navigate to Named Cells

Your Task: Jump directly to the named range "Revenue_Total" using the Name Box.

STEP-BY-STEP INSTRUCTIONS

1. Click the Name Box at the top-left (shows current cell address like "A1").
2. Type Revenue_Total and press Enter.

WHAT THE RESULT LOOKS LIKE



Excel navigates to and selects the named range. The Name Box displays the range name.

3 Customize Quick Access Toolbar

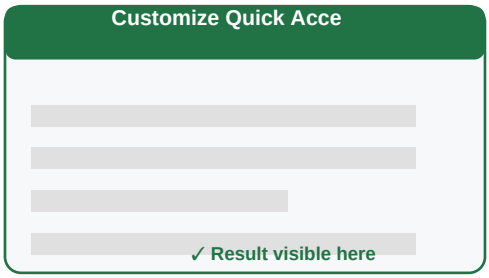
QAT drop

Your Task: Add the Format Cells command to the Quick Access Toolbar for one-click access.

STEP-BY-STEP INSTRUCTIONS

1. Click the dropdown arrow at the right end of the Quick Access Toolbar.
2. Choose More Commands.
3. In Choose commands from: select All Commands.
4. Find Format Cells → Add → OK.

WHAT THE RESULT LOOKS LIKE



The Format Cells button appears in the Quick Access Toolbar above the ribbon.

4 Configure Print Settings

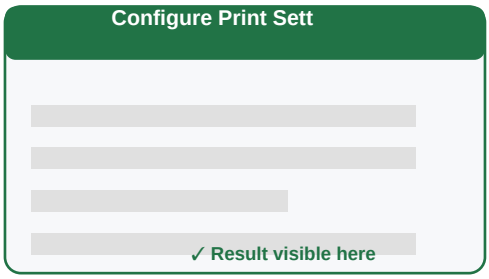
Page Lay

Your Task: Set the print area to A1:F14 and add a header with the company name.

STEP-BY-STEP INSTRUCTIONS

1. Select the range A1:F14.
2. Page Layout → Print Area → Set Print Area.
3. Page Layout → Page Setup dialog (■) → Header/Footer tab → Custom Header.
4. Type the company name in the Center section → OK.

WHAT THE RESULT LOOKS LIKE



A dashed border marks the print area. Print Preview (File → Print) shows only A1:F14 with the header.

5 Configure Rows and Columns

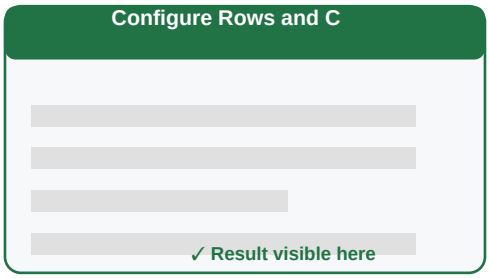
Right-clic

Your Task: Set all data row heights to 20 and auto-fit column A to its content width.

STEP-BY-STEP INSTRUCTIONS

1. Select rows 3–14 by clicking and dragging the row number selectors.
2. Right-click → Row Height → type 20 → OK.
3. Right-click column A header → AutoFit Column Width.

WHAT THE RESULT LOOKS LIKE



All selected rows are 20 units tall. Column A is wide enough to display all content without truncation.

6 Configure Workbook Theme

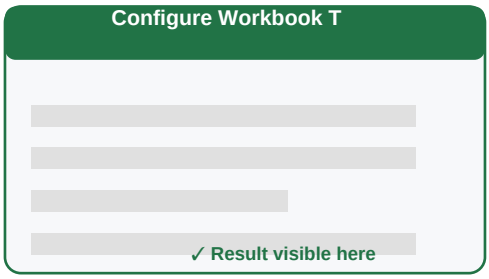
Page Lay

Your Task: Apply the Office theme for a consistent professional color scheme.

STEP-BY-STEP INSTRUCTIONS

1. Click the Page Layout tab.
2. In the Themes group, click Themes.
3. Choose Office from the gallery.

WHAT THE RESULT LOOKS LIKE



Colors, fonts, and effects update throughout the workbook to match the Office theme.

7 Freeze Rows and Columns

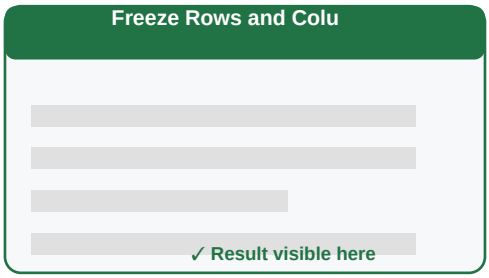
View → W

Your Task: Freeze the header row and first column so they stay visible when scrolling.

STEP-BY-STEP INSTRUCTIONS

1. Click cell B3 (freezes everything above and to the left).
2. View tab → Window group → Freeze Panes → Freeze Panes.
3. A dark line appears along row 2 and column A.

WHAT THE RESULT LOOKS LIKE



Dark freeze lines appear at the boundaries. Scrolling keeps the header row and first column always visible.

8 Modify Workbook Properties

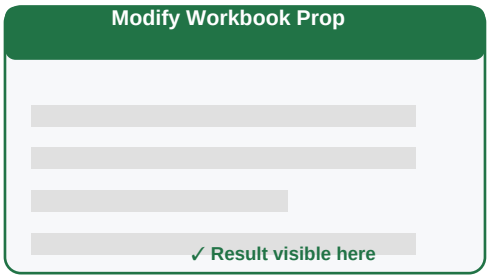
File → In

Your Task: Set the workbook Title to "DSC Financial Dashboard 2026" and Author to "Desert Sun Consulting".

STEP-BY-STEP INSTRUCTIONS

1. File tab → Info.
2. Click the Title field → type: DSC Financial Dashboard 2026.
3. Click the Author field → type: Desert Sun Consulting.
4. Press Esc to return to the workbook.

WHAT THE RESULT LOOKS LIKE



The Properties panel shows the filled-in values. These appear in Windows Explorer → file Properties → Details tab.

9 Save in Alternative Format

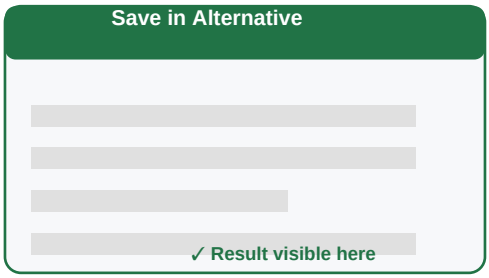
File → Sa

Your Task: Save a PDF copy of the workbook for distribution to stakeholders without Excel.

STEP-BY-STEP INSTRUCTIONS

1. File tab → Save As.
2. Choose a save location.
3. In the file type dropdown, choose PDF (*.pdf).
4. Click Save.

WHAT THE RESULT LOOKS LIKE



A PDF copy appears in the chosen location. The original .xlsx file is unchanged.
