1 Create an Excel Table

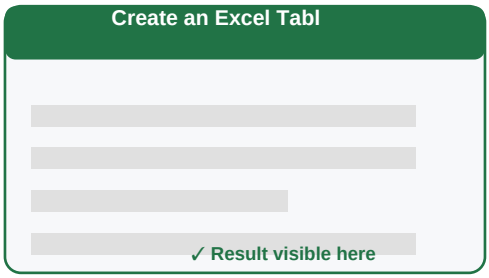
Insert →

Your Task: Convert the event data range into a structured Excel Table with filter dropdowns.

STEP-BY-STEP INSTRUCTIONS

1. Select any cell in the data range.
2. Insert tab → Tables → Table (or press Ctrl+T).
3. Confirm the range and check My table has headers.
4. Click OK.

WHAT THE RESULT LOOKS LIKE



The range becomes an Excel Table with filter dropdown arrows in each header, banded rows, and a Table Design tab.

2 Apply Table Style

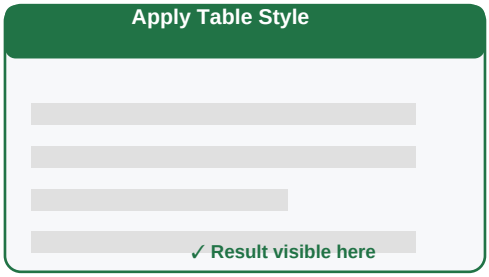
Table De

Your Task: Apply a professional blue medium table style to the event table.

STEP-BY-STEP INSTRUCTIONS

1. Click anywhere inside the table.
2. Table Design tab → Table Styles group.
3. Hover over styles to preview.
4. Click Table Style Medium 9 or a preferred blue style.

WHAT THE RESULT LOOKS LIKE



The table shows a colored header row, banded rows, and borders matching the chosen style.

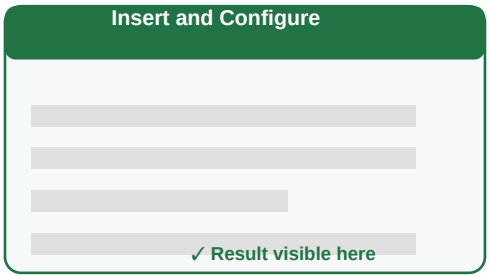
3 Insert and Configure Total Row

Your Task: Add a Total Row and configure each column to show the right aggregation.

STEP-BY-STEP INSTRUCTIONS

1. Click inside the table.
2. Table Design → Table Style Options → check Total Row.
3. Click a cell in the Total row → dropdown appears.
4. Choose Sum for Revenue, Sum for Attendees, Count for Event Name.

WHAT THE RESULT LOOKS LIKE



A Total row appears at the bottom with aggregate values. Each cell has a dropdown for changing the function.

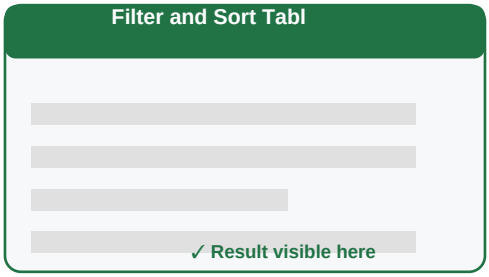
4 Filter and Sort Table Data

Your Task: Filter to show only Corporate events, then sort by Date ascending.

STEP-BY-STEP INSTRUCTIONS

1. Click the Category dropdown arrow → uncheck Select All → check Corporate → OK.
2. Click the Date dropdown → Sort Oldest to Newest.
3. To clear the filter: click the funnel icon in Category → Clear Filter.

WHAT THE RESULT LOOKS LIKE



Only Corporate events are visible, sorted oldest to newest. A funnel icon shows in the Category header.

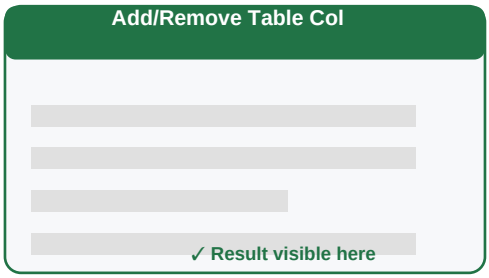
5 Add/Remove Table Columns and Rows

Your Task: Add a "Profit Margin" column to the right and remove the duplicate rows.

STEP-BY-STEP INSTRUCTIONS

1. Click the cell immediately right of the last column header.
2. Type: Profit Margin. The table expands automatically.
3. To remove a column: right-click its header inside the table → Delete → Table Columns.

WHAT THE RESULT LOOKS LIKE



The Profit Margin column is added. Any removed column disappears and the table adjusts.

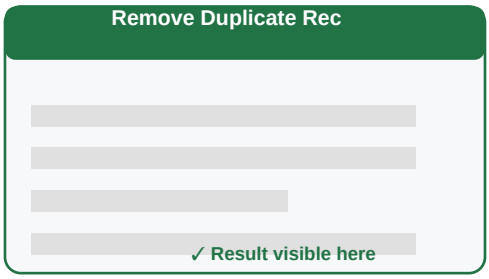
6 Remove Duplicate Records

Your Task: Find and remove all duplicate event rows caused by the data import error.

STEP-BY-STEP INSTRUCTIONS

1. Click anywhere inside the table.
2. Table Design tab → Tools group → Remove Duplicates.
3. Select all columns to check → OK.
4. Excel reports how many duplicates were found and removed.

WHAT THE RESULT LOOKS LIKE



A dialog confirms the number of duplicate rows removed. The table now contains only unique records.
