03: Tables & Lists

Practice Instructio

How to use this guide: Download and open your **Word_D3_Starter** file. Work through each skill using the instructions below. Each skill shows what to do and what the result looks like. Check off each skill on the IS101 reference page.

Skills in This Guide

1. Create a Table
2. Insert Rows and Columns
3. Delete Rows and Columns
4. Merge Table Cells
5. Split Table Cells
6. Apply Table Style
7. Modify Table Style Options
8. Sort Table Data
9. Repeat Header Row
10. Convert Text to Table
11. Create Numbered List
12. Create Bulleted List

1 Create a Table

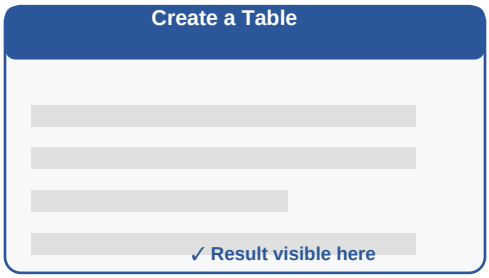
Insert →

Your Task: Convert the quarterly revenue plain text data into a professional 4-column table.

STEP-BY-STEP INSTRUCTIONS

1. Click where you want the table.
2. Insert tab → Tables → Table.
3. Drag to select 4 columns × the right number of rows.
4. Type data into each cell. Press Tab to move between cells.

WHAT THE RESULT LOOKS LIKE



A clean bordered table appears with data organized in columns: Quarter, Revenue, Expenses, Net Profit.

2 Insert Rows and Columns

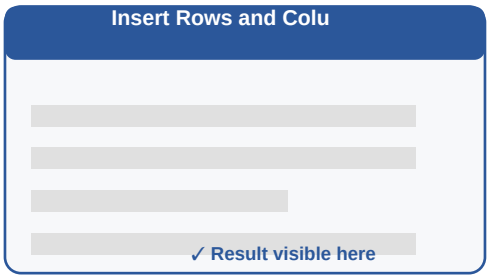
Table Lay

Your Task: Add a new row to the bottom of the revenue table.

STEP-BY-STEP INSTRUCTIONS

1. Click in the last row of the table.
2. Table Layout tab → Rows & Columns → Insert Below.
3. Or right-click → Insert → Insert Rows Below.

WHAT THE RESULT LOOKS LIKE



A new empty row appears at the bottom of the table ready for data entry.

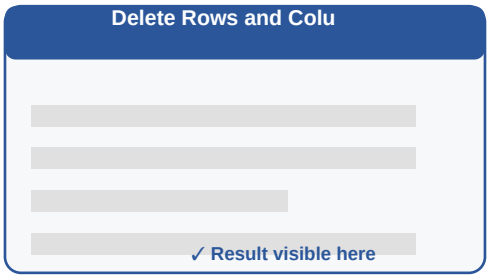
3 Delete Rows and Columns

Your Task: Delete the duplicate Q2 row from the revenue table.

STEP-BY-STEP INSTRUCTIONS

1. Click in the duplicate row.
2. Table Layout tab → Rows & Columns → Delete → Delete Rows.
3. Or right-click the row → Delete Rows.

WHAT THE RESULT LOOKS LIKE



The duplicate row is removed. The table adjusts automatically and remaining rows renumber correctly.

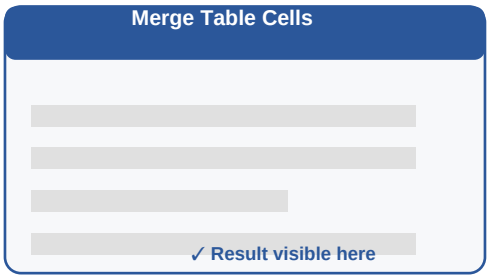
4 Merge Table Cells

Your Task: Merge all cells in the top row to create a single spanning title cell.

STEP-BY-STEP INSTRUCTIONS

1. Select all cells in the top row by clicking and dragging.
2. Table Layout tab → Merge group → Merge Cells.
3. Type the table title in the merged cell.

WHAT THE RESULT LOOKS LIKE



The top row becomes one wide cell spanning all columns. The table title is centered across the full width.

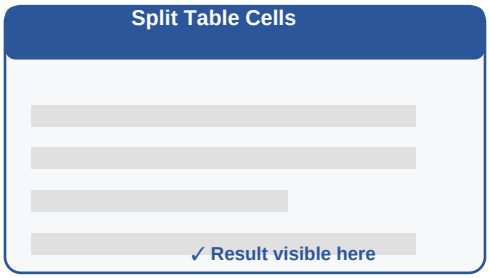
5 Split Table Cells

Your Task: Split the Address cell in the vendor table into separate City and State cells.

STEP-BY-STEP INSTRUCTIONS

1. Click in the Address cell.
2. Table Layout → Merge → Split Cells.
3. Set Number of columns: 2, rows: 1 → OK.

WHAT THE RESULT LOOKS LIKE



The cell splits into two cells. The original text stays in the first cell; the second is empty for State data.

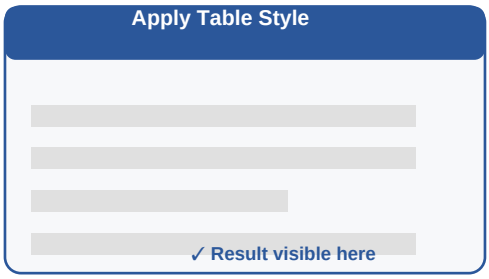
6 Apply Table Style

Your Task: Apply a professional grid style to the revenue table.

STEP-BY-STEP INSTRUCTIONS

1. Click anywhere inside the table.
2. Table Design tab appears on the ribbon.
3. In Table Styles group, hover to preview styles.
4. Click Grid Table 4 - Accent 1 or a preferred style.

WHAT THE RESULT LOOKS LIKE



The table displays colored headers, alternating row shading, and professional borders matching the chosen style.

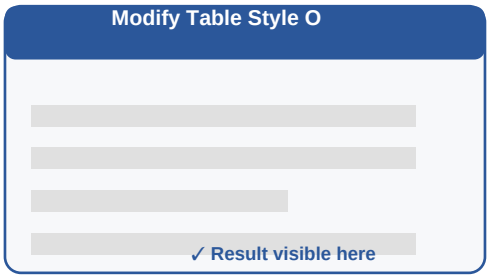
7 Modify Table Style Options

Your Task: Enable Header Row highlighting and Banded Rows for the revenue table.

STEP-BY-STEP INSTRUCTIONS

1. Click anywhere inside the table.
2. Table Design tab → Table Style Options group.
3. Check Header Row.
4. Check Banded Rows.

WHAT THE RESULT LOOKS LIKE



The header row is visually distinct from data rows. Alternating rows have different shading for readability.

8 Sort Table Data

Your Task: Sort the client table alphabetically by Client Name.

STEP-BY-STEP INSTRUCTIONS

1. Click anywhere inside the table.
2. Table Layout tab → Data group → Sort.
3. Sort by: Client Name column, Ascending (A to Z).
4. Click OK.

WHAT THE RESULT LOOKS LIKE

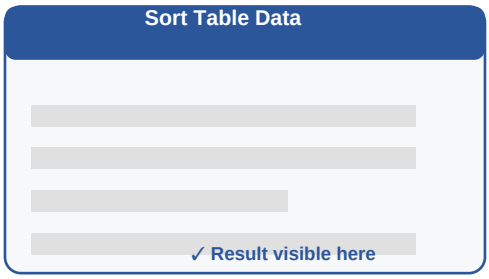


Table rows rearrange alphabetically by client name. The header row stays in place at the top.

9 Repeat Header Row

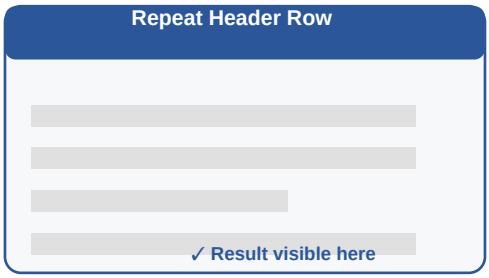
Table Lay

Your Task: Set the table header row to repeat at the top of every page since the table spans multiple pages.

STEP-BY-STEP INSTRUCTIONS

1. Click in the header row.
2. Table Layout tab → Data group → Repeat Header Rows.

WHAT THE RESULT LOOKS LIKE



When the table runs onto the next page, the header row appears again automatically at the top.

10 Convert Text to Table

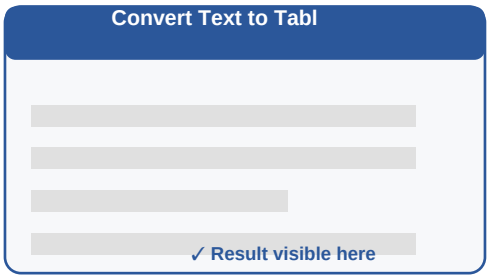
Insert →

Your Task: Convert the tab-separated vendor list into a structured table.

STEP-BY-STEP INSTRUCTIONS

1. Select all the tab-separated text.
2. Insert tab → Tables → Table → Convert Text to Table.
3. Set Separate text at: Tabs.
4. Confirm the number of columns → OK.

WHAT THE RESULT LOOKS LIKE



The plain text converts into a formatted table with each tab-separated value in its own cell.

11 Create Numbered List

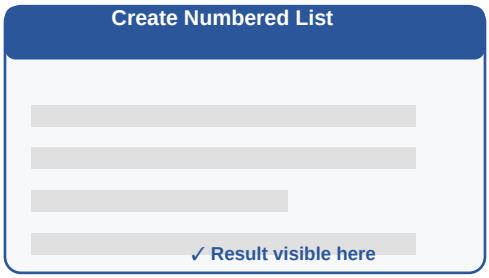
Home →

Your Task: Format the five Strategic Objectives as a numbered list.

STEP-BY-STEP INSTRUCTIONS

1. Select the objectives text.
2. Home tab → Paragraph group → click the Numbering button.
3. Word automatically numbers each item.

WHAT THE RESULT LOOKS LIKE



Each objective is numbered 1 through 5. Adding or removing items renumbers automatically.

12 Create Bulleted List

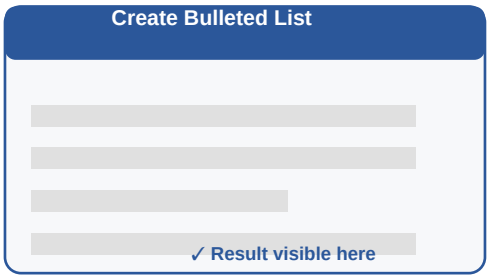
Home →

Your Task: Format the Services Offered text as a bulleted list.

STEP-BY-STEP INSTRUCTIONS

1. Select the services text.
2. Home tab → Paragraph group → click the Bullets button.

WHAT THE RESULT LOOKS LIKE



Each service item has a bullet point and is visually separated from surrounding body text.
