Excel Project — Variation 2

Oasis Events · Inventory & Budget Workbook
Microsoft Excel Associate (MO-210) · 25 tasks · 100 points

Scenario. You are an operations analyst at Oasis Events, a Las Vegas event company. Finish the catering inventory and event-budget workbook so item codes, totals, and lookups all populate automatically.

Open **Excel_Core1_Starter.xlsx** in Microsoft Excel and complete every task below. Each task lists the ribbon path and its point value. When finished, save the file and upload it to the Core 1 grader for instant scoring.

E1 — Manage Worksheets & Workbooks

1. Turn on Show Formulas so the audit copy displays all formulas — **2** pt
`Formulas → Show Formulas`

2. Set Title = "Event Inventory & Budget" and Author properties — **3** pt
`File → Info → Properties`

22. Add a header with the company name and a footer page number — **4** pt
`Insert → Header & Footer`

24. Freeze the inventory header row — **3** pt
`View → Freeze Panes`

E2 — Manage Data Cells & Ranges

3. Use SEQUENCE to generate the line-item ID column — **3** pt
`Type =SEQUENCE(...)`

4. Format the Unit Cost and Line Total columns as Currency — **4** pt
`Home → Number group`

17. Flag items below reorder level with an icon set — **5** pt
`Home → Conditional Formatting`

18. Name the price-list range "PriceList" — **4** pt
`Formulas → Define Name (or Name Box)`

23. Merge and center the workbook title banner — **3** pt
`Home → Merge & Center`

E3 — Manage Tables & Table Data

5. Convert the inventory list to an Excel Table — **3** pt

`Insert → Table (Ctrl+T)`

6. Add a new "Line Total" column to the inventory table — **4** pt

`Table Design → Resize Table`

7. Add a Total Row summing the Line Total column — **4** pt

`Table Design → Total Row`

25. Sort inventory by category then item name — **3** pt

`Data → Sort → Add Level`

E4 — Formulas & Functions

8. Use a structured reference (Table[Qty]*Table[UnitCost]) for the line total — **6** pt

`Type Table[Column]`

9. Use SUMIF to total spend per item category — **6** pt

`Formulas → Math & Trig → SUMIF`

10. Use LEFT/RIGHT/MID to build a short SKU from item names — **4** pt

`Formulas → Text`

11. Use UPPER to standardize category codes and LEN to validate length — **4** pt

`Formulas → Text`

12. Use TEXTJOIN to build a combined item label — **5** pt

`Formulas → Text`

13. Use XLOOKUP against the price list to return each item's unit cost — **6** pt

`Formulas → Lookup & Reference → XLOOKUP`

14. Use SORT() to produce a sorted vendor list dynamically — **4** pt

`Type =SORT(...)`

15. Use UNIQUE() to list the distinct categories — **4** pt

`Type =UNIQUE(...)`

16. Use YEAR/MONTH/DAY to break out the event date — **5** pt

`Formulas → Date & Time`

E5 — Manage Charts

19. Create a Pie chart of spend by category — **4** pt

`Insert → Charts → Column`

20. Apply a chart style to the spend chart — **4** pt

`Chart Design → Chart Styles`

21. Add alternative text to the spend chart — **3** pt

`Right-click chart → Edit Alt Text`

Total: 100 points · 25 tasks
