IS101 — Introduction to Computing

Staffing Roster Workbook

Nevada Valley Healthcare · Unit 3 — Spreadsheets · Core Project 2 · 100 points · 26 tasks

How to use this document: Download the starter workbook from the Project Grader page. Open it in Microsoft Excel 365 and keep this sheet open beside it. Work through each task in order. When you're done, save the file and upload it to the grader for instant scoring.

D1 — Page Layout & Properties 24 points · 6 tasks

Task 1 4 points

Adjust column widths and row heights for readability

WHY THIS MATTERS

Properly sized columns and rows prevent data from being cut off and make the roster easier to scan.

WHERE TO FIND IT

Select columns that are too narrow → double-click the column border to auto-fit, or drag to a custom width. For row height: select rows → right-click → Row Height → enter a value.

HOW YOU'LL KNOW IT WORKED

All data is fully visible — no truncated text or ### symbols.

Task 2 5 points

Add a header with department name and a footer with page numbers

WHY THIS MATTERS

Headers and footers identify the document and add page numbers for printed copies.

WHERE TO FIND IT

Page Layout tab → Page Setup dialog launcher → Header/Footer tab → Custom Header: type “Nevada Valley Healthcare — Staffing” → Custom Footer: insert page number.

HOW YOU'LL KNOW IT WORKED

Print Preview shows the department name at the top and page numbers at the bottom.

Task 3 4 points

Switch to Page Layout view

WHY THIS MATTERS

Page Layout view shows headers, footers, margins, and page breaks as they will appear when printed.

WHERE TO FIND IT

View tab → Workbook Views group → Page Layout.

HOW YOU'LL KNOW IT WORKED

The worksheet shows page margins, headers, and footers. The View tab highlights Page Layout.

Task 4 3 points

Set a Print Area covering the roster data

WHY THIS MATTERS

A Print Area ensures only the roster data prints, not blank areas of the worksheet.

WHERE TO FIND IT

Select the roster data range → Page Layout tab → Print Area → Set Print Area.

HOW YOU'LL KNOW IT WORKED

Print Preview shows only the selected range.

Task 5 3 points

Enable Fit to Page (scale to fit one page wide)

WHY THIS MATTERS

Fit to Page scales the printout so all columns fit on one page without horizontal page breaks.

WHERE TO FIND IT

Page Layout tab → Scale to Fit group → set Width to “1 page”.

HOW YOU'LL KNOW IT WORKED

Print Preview shows all columns on a single page width.

Task 6 5 points

Insert a cell comment on any roster cell

WHY THIS MATTERS

Comments let you add notes to specific cells without changing the data.

WHERE TO FIND IT

Right-click any cell in the roster → Insert Comment (or New Note) → type your note.

HOW YOU'LL KNOW IT WORKED

A red triangle appears in the cell corner; hovering shows your comment.

D2 — AutoFill & Cell Styles 11 points · 3 tasks

Task 7 5 points

AutoFill the shift week series through Week 12

WHY THIS MATTERS

AutoFill extends a pattern (Week 1, Week 2, Week 3…) automatically. The starter has “Week 1” and “Week 2” already entered in the shift schedule area. **Tip:** If you are in Page Layout view (from Task 3), switch to Normal view first (View {ARR} Normal) to make the AutoFill drag easier. After completing the AutoFill, switch back to Page Layout view (View {ARR} Page Layout) so Task 3 remains correct.

WHERE TO FIND IT

Select the cells containing “Week 1” and “Week 2” → grab the fill handle (small square at the bottom-right corner of the selection) → drag to the right until the tooltip shows “Week 12.”

HOW YOU'LL KNOW IT WORKED

Cells show Week 1 through Week 12 in sequence. Switch back to Page Layout view when done.

Task 8 3 points

Apply a named cell style to the workbook title

WHY THIS MATTERS

Named cell styles (like Title, Heading 1, or Accent) provide consistent, professional formatting.

WHERE TO FIND IT

Click the title cell (A1) → Home tab → Cell Styles → choose a style (e.g., Title, Heading 1, or any Accent style).

HOW YOU'LL KNOW IT WORKED

The title cell has a distinctive format different from the rest of the data.

Task 9 4 points

Apply borders to the roster data grid

WHY THIS MATTERS

Borders define the grid lines around cells, making the roster easier to read.

WHERE TO FIND IT
Select the roster data range → Home tab → Font group → Borders dropdown → All Borders.

HOW YOU'LL KNOW IT WORKED
Every cell in the roster has visible border lines on all four sides.

D3 — Number Formats & Sparklines 13 points · 3 tasks

Task 10 3 points

Apply Currency format to the Hourly Rate column

WHY THIS MATTERS
Currency formatting adds dollar signs and decimal places to financial data.

WHERE TO FIND IT
Select the Hourly Rate column data (column D) → Home tab → Number group → Currency.

HOW YOU'LL KNOW IT WORKED
Values show as $25.00 format with dollar signs and two decimals.

Task 11 5 points

Insert column sparklines for weekly shift trends

WHY THIS MATTERS
Sparklines are tiny in-cell charts that show trends at a glance. Use the weekly shift data in columns I, J, and K as the data source, and place the sparklines in column M.

WHERE TO FIND IT
Select cell M4 through M7 (or however many employees have data) → Insert tab → Sparklines group → Column → Data Range: select I4:K7 → OK.

HOW YOU'LL KNOW IT WORKED
Small column charts appear in column M showing each employee's shift pattern across weeks.

Task 26 3 points

Apply Percentage format to the Coverage column

WHY THIS MATTERS
Percentage format displays decimal values as percentages (0.85 becomes 85%).

WHERE TO FIND IT
Select the Coverage % column data (column F) → Home tab → Number group → Percent Style.

HOW YOU'LL KNOW IT WORKED
Values display as percentages like 85% instead of 0.85.

D4 — Tables & Data Management 31 points · 8 tasks

Task 12 3 points

Merge and center the title banner across the data columns

WHY THIS MATTERS
Merging creates a wide banner that spans the full width of the roster.

WHERE TO FIND IT
Select cells A1 through the last data column in row 1 → Home tab → Alignment group → Merge & Center.

HOW YOU'LL KNOW IT WORKED
The title "Nevada Valley Healthcare — Staffing" spans all columns in one centered cell.

Task 13 5 points

Convert the roster data to an Excel Table

WHY THIS MATTERS

Excel Tables add automatic filtering, structured references, and easy formatting.

WHERE TO FIND IT

Click anywhere in the roster data → press Ctrl+T (or Insert tab → Table) → verify the range is correct → OK.

HOW YOU'LL KNOW IT WORKED

The data has filter arrows on each column header; the Table Design tab appears when you click in the table.

Task 14 4 points

Enable Banded Rows and Header Row options

WHY THIS MATTERS

Banded rows alternate row colors for readability; Header Row ensures the top row stays formatted as headers.

WHERE TO FIND IT

Click in the table → Table Design tab → Table Style Options group → check Banded Rows and Header Row.

HOW YOU'LL KNOW IT WORKED

Rows alternate between two colors; the header row has distinct formatting.

Task 15 5 points

Convert the Certifications table back to a plain range

WHY THIS MATTERS

Sometimes a table needs to be converted back to a normal range. Find the Staff Certifications table and convert it.

WHERE TO FIND IT

Click anywhere in the Certifications table → Table Design tab → Tools group → Convert to Range → Yes.

HOW YOU'LL KNOW IT WORKED

The Certifications data no longer shows filter arrows or the Table Design tab.

Task 16 4 points

Apply a table style to the roster table

WHY THIS MATTERS

Table styles add professional formatting — colors, borders, and shading — in one click.

WHERE TO FIND IT

Click in the roster table → Table Design tab → Table Styles gallery → choose any style.

HOW YOU'LL KNOW IT WORKED

The table has consistent formatting with colored headers and/or banded rows.

Task 17 3 points

Filter the roster to show only the Emergency department

WHY THIS MATTERS

Filtering hides rows that don’t match your criteria.

WHERE TO FIND IT

Click the dropdown arrow on the Department column header → uncheck “Select All” → check only “Emergency” → OK.

HOW YOU'LL KNOW IT WORKED

Only Emergency department rows are visible.

Task 18 3 points

Freeze the first column so it stays visible while scrolling

WHY THIS MATTERS
Freezing keeps important reference columns visible when scrolling horizontally through wide data.

WHERE TO FIND IT
Click cell B1 → View tab → Freeze Panes → Freeze Panes.

HOW YOU'LL KNOW IT WORKED
When you scroll right, column A stays visible.

Task 19 3 points

Vertically center-align all data cells

WHY THIS MATTERS
Vertical centering positions text in the middle of each cell for a cleaner look.

WHERE TO FIND IT
Select all data cells → Home tab → Alignment group → Middle Align (the middle vertical alignment button).

HOW YOU'LL KNOW IT WORKED
Text is centered vertically within each cell instead of sitting at the top or bottom.

D5 — Formatting & Conditional Formatting 6 points · 2 tasks

Task 20 2 points

Enable Wrap Text on cells with long content

WHY THIS MATTERS
Wrap Text shows the full content of a cell on multiple lines instead of cutting it off.

WHERE TO FIND IT
Select cells with long text (like the Responsibilities column) → Home tab → Alignment group → Wrap Text.

HOW YOU'LL KNOW IT WORKED
Long text wraps to multiple lines within the cell instead of overflowing.

Task 21 4 points

Apply a Color Scale conditional format to a numeric column

WHY THIS MATTERS
Color scales shade cells from low to high values, making patterns visible at a glance.

WHERE TO FIND IT
Select a numeric column (like Coverage % or PTO Days) → Home tab → Conditional Formatting → Color Scales → choose a color gradient.

HOW YOU'LL KNOW IT WORKED
Cells show a gradient from one color (low values) to another (high values).

D6 — Charts & Properties 15 points · 3 tasks

Task 22 5 points

Create a bar chart of staffing data

WHY THIS MATTERS
Charts visualize data and make comparisons easy to see at a glance.

WHERE TO FIND IT
Select the data you want to chart (e.g., Staff Name and Hours or Coverage) → Insert tab → Charts group → Insert Bar Chart.

HOW YOU'LL KNOW IT WORKED

A bar chart appears on the worksheet.

Task 23 5 points

Move the chart to its own chart sheet

WHY THIS MATTERS

A chart sheet displays the chart full-size on its own tab, separate from the data.

WHERE TO FIND IT

Click the chart → Chart Design tab → Move Chart → New sheet → type a name → OK.

HOW YOU'LL KNOW IT WORKED

A new tab appears at the bottom of the workbook showing only the chart.

Task 24 4 points

Apply a chart style

WHY THIS MATTERS

Chart styles change the overall look of the chart — colors, effects, and layout — in one click.

WHERE TO FIND IT

Click the chart → Chart Design tab → Chart Styles gallery → choose a style.

HOW YOU'LL KNOW IT WORKED

The chart’s appearance changes to the selected style.

Task 25 3 points

Set document properties: Title and Author

WHY THIS MATTERS

Metadata makes the workbook identifiable and searchable.

WHERE TO FIND IT

File tab → Info → Properties panel. Set Title to “Nevada Valley Healthcare — Staffing Roster” and Author to your name.

HOW YOU'LL KNOW IT WORKED

File {ARR} Info shows Title and Author populated.

Total: 100 points. Every task is graded automatically when you upload your file. © Dr. Mark Taormino · All Rights Reserved · College of Southern Nevada
